

With the introduction of the V-10 system in 1996, ASSA ushered in a new generation of lock technology offering patent protected, unique geographically exclusive keyways for ASSA authorized security centers and end users. The innovative V-10 key design and cylinder helped to eliminate unauthorized duplicate keys and to maintain a key control system that is unmatched in the industry.

**ASSA® V-10**

## V-10 High Security Lock

Patented key design and exclusive end-user keyways offer maximum protection against unauthorized key duplication and the highest level of control currently available. V-10 cylinders meet UL437 standards for pick and drill resistance. Cylinders incorporate a dual locking mechanism with coded side bar and specially designed stainless steel pins to thwart picking attempts. Rim, mortise and cylindrical lock cylinders are available to retrofit most popular brands of commercial hardware and are field serviceable.

### Assa V-10 is ideally suited for:

- Detention facilities
- Military Installations
- High tech companies
- Offices
- Manufacturing facilities
- Pharmaceutical companies
- Financial institutions

### Features and Benefits

- Mortise and Rim Cylinders
- SARGENT ASSA V-10 mortise and rim cylinders are designed to be compatible with all SARGENT exit devices and mortise locksets.
- Key-in-Knob & Key-in-Lever Cylinders
- Greatly improving key control, the V-10 cylindrical cylinders can replace original cylinders without replacing the entire lockset.

## Available V-10 Products

### V-10 Mortise and Rim Cylinders

ASSA provides a full line of mortise cylinders designed to retrofit into most leading lock manufacturers' locksets and exit devices including Sargent, Arrow, Schlage, Yale, Corbin-Russwin, Best, and Von Duprin. Mortise cylinders are offered in lengths ranging from 1-1/8" to 2" and BHMA finishes 625, 626, 605, 606, 612, and 624. ASSA mortise and rim cylinders are available in removable core for quick and easy rekeying capabilities.

### V-10 Cylindrical Lock Cylinders

ASSA's key-in-knob and key-in-lever type cylinders provide the ultimate in high security retrofit for a variety of leading lockset manufacturers including Sargent, Arrow, Corbin-Russwin, Yale, Schlage, and Weiser. All cylinders are available in BHMA hardware finishes 625, 626, 605, 606, 612, and 624.

### V-10 High Security Deadbolts

The ASSA 6000 Series deadbolt is designed to withstand any form of physical attack including drilling, prying, driving, or pulling. Its free spinning guard collars protect it from pipe wrenching while its hardened inserts guard against drilling. The 6000 comes equipped with the ASSA Hardhat to protect it from outside through-the-door attacks known as "ice picking." Removable core is an option with the ASSA 6000 deadbolt and the product is available in BHMA hardware finishes 625, 626, 605, 606, 612, 624, and 609.

### V-10 High Security Padlocks

ASSA padlocks are constructed of the highest quality components and are capable of withstanding the most relentless forms of physical attack. The Number 2 padlock features a body made of chrome plated extruded brass with a rust resistant case hardened steel shackle. The Number 3 padlock features both a case hardened steel body and shackle capable of standing up to more than 3 1/2 tons of force. The locking mechanism utilizes two case hardened steel balls and there are no external rivets or screws. Each model has weep holes for positive water drainage and protection from ice buildup. Removable core is available for the Number 2 padlocks only.

### V-10 Auxiliary Locks

ASSA High Security Auxiliary Locks utilize the same high security features and master keying capabilities as our other products plus allowing for innumerable uses and applications. We offer high quality cam locks, window locks, and cabinet locks.
